

How to Save Pictures from the Internet

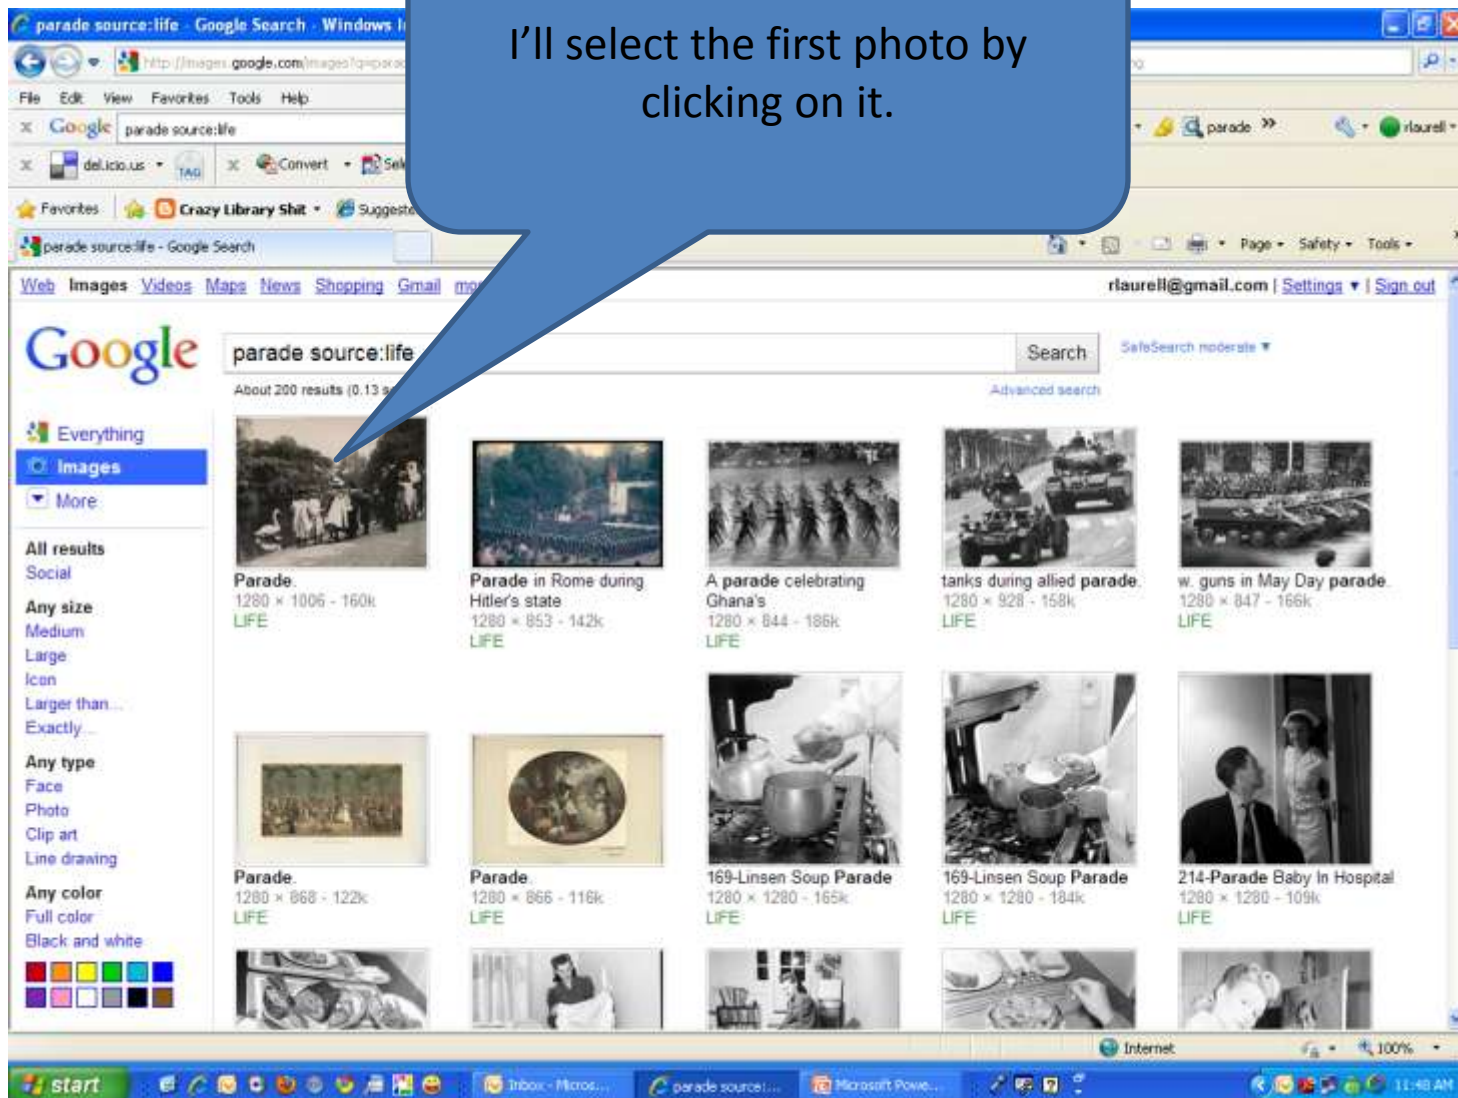

Please remember these photos can only be used for private non-commercial purposes

Find an image you wish to save on the Internet. I used Google Images.

I'll select the first photo by clicking on it.

This is what the page looks like. Notice they provide suggestions of related photos at the right.

1. You will get another pop up to select where you want to save your picture. Be sure to browse to "My Pictures." You want to save pictures in this folder. If you have created a separate folder for your pictures then select that folder from those listed.

3. Then click Save.

2. Name the picture by typing in this box. Name it something that means something to you.

And that's it!! you now have that picture on your hard drive on your computer.
